TIPS

WOOD

Changes in color and small nicks or cracks* can appear because the wood is a living material. This is the proof that each Lairial luminaire is unique.

* do not question the structure of the object

PAINTING

Lairial chose to keep raw wood outside without any treatment. We recommend not to apply paint, varnish or any external treatment.

MAINTENANCE

The Plug & Light system facilitates maintenance and limits works-at-height. Simply disconnect* the lighting module from the wiring module and place it on the ground or on a table to operate in optimal conditions. When it's done, just reconnect it*.

* notice upon request

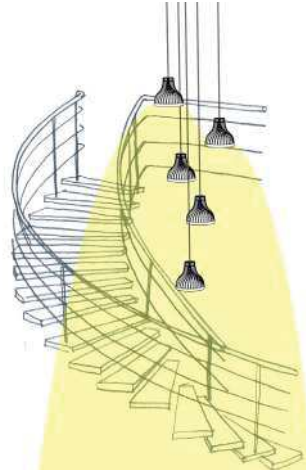

CLEANING

The shape of the lamps prevents dust from settling on the strips. If necessary, extract them one by one. Then reinsert them perpendiculary.
Clean the disk with a soft cloth or a duster, without water, without detergent, without chemicals. Or vacuum it softly.

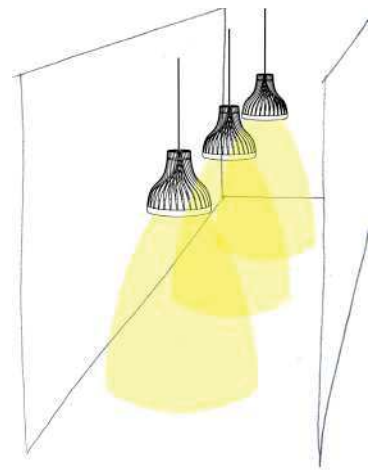

STAGING

LOBBY: front desk, reception desk, lounge
